- Photoshop
- Illustrator
- InDesign
- Premiere
- After Effect
- Figma

## ABOUT ME

As a developer my favorite stack to start a new project is :
Next.js (React) on the frontend, Nest.js as a backend, Tailwind for styling, PostgreSQL as a database

I played soccer in France and in the United States as a College Athlete and rewarded National Player of the Week on time and won the conference league of Kansas.

I love discovering the world and working at the same time.
